Core Competencies

• Data Analytics • GIS Engineering • Cartographic Production • Data Visualization • Graphic Design •

Education

B.S. in Cartography + GIS, Data Science, Geography

University of Wisconsin-Madison

Sep 2023 -
PRESENT

GPA: 3.5

Minors in French and Environmental Studies

- Lead Designer, Wisconsin Urbanist
- Selected Member, Women in Business-Technology
- Graphic Designer, Wisconsin Engineer
- UW Design Interactive

FAC-ALLSH Student, Study Abroad

University of Aix-Marseille (Aix-en-Provence)

Jan 2026 -
May 2026

Professional Experience

GIS Intern, Stantec | Milwaukee/Madison, WI

May 2026 -
PRESENT

- Supporting environmental project teams with GIS data creation, editing, and analysis and assisting with field data collection using GPS and mobile GIS tools
- Cartographic production for client deliverables, performing geoprocessing tasks and spatial analysis, maintaining GIS databases
- Collaborating with environmental scientists, engineers, and planners
- Worked on projects for Wetland Delineations, Phase I ESA, Transmission Line Interconnections, Species Surveys, Noise Impact Assessments

IT Analytics Intern, Clarios | Glendale, WI

Jun 2025 -
Aug 2025

- Created and maintained automated data pipelines using SQL, Snowflake, and Matillion and developed interactive Power BI dashboards to support financial reconciliation and enterprise reporting.
- Translated business requirements across Finance, Supply Chain, Procurement, and HR into scalable analytics solutions, aligning technical deliverables with operational goals.
- Resolved data integration and quality issues within QAD ERP systems, improving data consistency and reporting accuracy.
- Collaborated cross-functionally with business and engineering teams to enhance data-driven decision-making and process visibility across the organization.
- Understood manufacturing and automotive operations, such as car battery production processes and role of AI and analytics in optimizing future industry performance.

- Create custom static and interactive maps for university and external clients using ArcGIS Pro, ArcGIS Online, QGIS, and Adobe Illustrator.
- Manage projects end-to-end, including data sourcing, cleaning, spatial analysis, and cartographic design, ensuring maps align with client goals and visual standards.
- Apply design and human interaction principles to produce clear, accessible, and visually cohesive maps for print and web.
- Contributing to published works and statewide initiatives, collaborating directly with clients such as the Center for the Study of the American Constitution and the Wisconsin Idea Seminar

Responsibilities

- Assisted employees with hardware and software troubleshooting.
- Configured user accounts and network permissions.

Languages

- English – **Native**
- Tamil - **Native**
- French – **Professional Working Proficiency (B2)**

Skills

Programming Languages: (*Experience with Software Development, Data Science, Geocomputing, & Web Development*): Java, Python, R, SQL, Javascript, HTML, CSS, ReactJS

Analytics Tools: Snowflake, Matillion, PowerBI, Tableau, Attunity, Azure DevOPs, Excel

Geospatial Tools: ArcGIS (Pro, Online, Storymaps, Survey123), QGIS, Mapbox, ENVI

Adobe Creative Cloud: Illustrator (Certified), Photoshop, Premiere Pro, Indesign, After Effects, Lightroom

Domain Knowledge/Experience In:

- Environmental Consulting, Physical + Human Geography, Urban Planning, Civil Engineering,
- Manufacturing & Battery/Automotive Industry
- Data Analytics & Visualization
- Finance, Supplychain, Procurement

Relevant Coursework

- STAT 340 - *Data Science Modeling II*
- CS 300 - *Java Programming II*
- CS 320 - *Python Programming II*
- STAT 453 - *Deep Learning and Generative Models*
- GEOG 378 - *Geocomputing (Python)*
- GEOG 579 - *Advanced GIS & Analysis*
- GEOG 578 - *GIS Applications*
- GEOG 572 - *Graphic Design in Cartography*
- GEOG 365 - *Geography Research Methods*
